

Remedial Support for FET Colleges

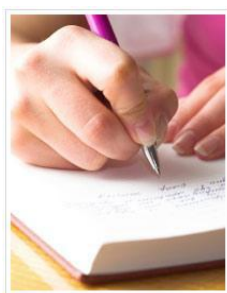

A real need was identified for a learner-oriented, independent, academic support solution focused on offering remedial learning in key areas for level 2 students across the country.

<http://www.learnsapes.co.za/fet.html>

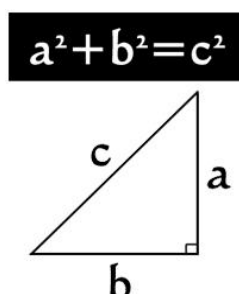

We are pleased to announce that LearnScapes FET is now ready with the 3 fundamental (compulsory) subjects for FET Colleges that wish to provide remedial academic support to their Level 2 learners in:

- English
- Mathematics
- Life Orientation

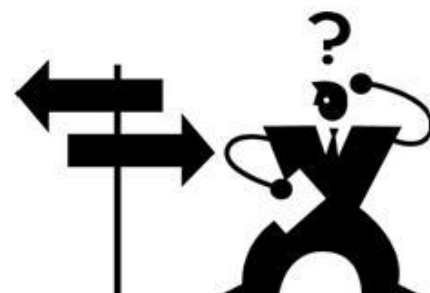

LearnScapes FET is easily deployed in any suitable computer lab and even teaches students how to use the computer before focusing on the subjects themselves. What's more, LearnScapes is open to your suggestions, and will continually publish learning content to address any new skills gaps that come up.

English

Mathematics

Life Orientation

You can also download limited downgraded samples for a quick preview here:

Science will be completed
November 2010.

Powerful Reporting

LearnScapes Learner Management System (LMS) provides a comprehensive set of powerful real-time reports so that you can measure your investment and view learner usage and progress.

Course Usage Report: This report allows you to extract basic usage data on courses that have been accessed in the system.

User Usage Report: This report shows a single learner's tracking data inside a course.
